Joshua Torres

Full Stack web developer leveraging a background in customer service to provide great communication and patience. Earned a certificate in Full Stack Web Development from the University Of Washington Coding Boot Camp. Innovative problem-solver who is enthusiastic about developing apps with a primary focus on mobile design first. Strengths in teamwork, creativity, ingenuity, and building projects from ideas to finished Applications.

Technical Skills

JavaScript, CSS, HTML, SQL, NoSQL, GitHub, MongoDB, MERN Stack
MySQL, Express, React, Node, Handlebars, jQuery, Bootstrap,

Projects

SkillSwap –

Summary: SkillSwap is a website where you can post your skills that you want to teach, whether it's tutoring, cooking, or anything in between. While you or others can search for skills by category or skillname, to email the one who posted the skill.

Role: I worked mostly on the DB, frontend and backend, as well as the react functionality.

Tools: React, Apollo, Mongoose, JWT, GraphQL and Heroku.
